

Technology Panel Solutions

Thursday, June 14
Afternoon Session

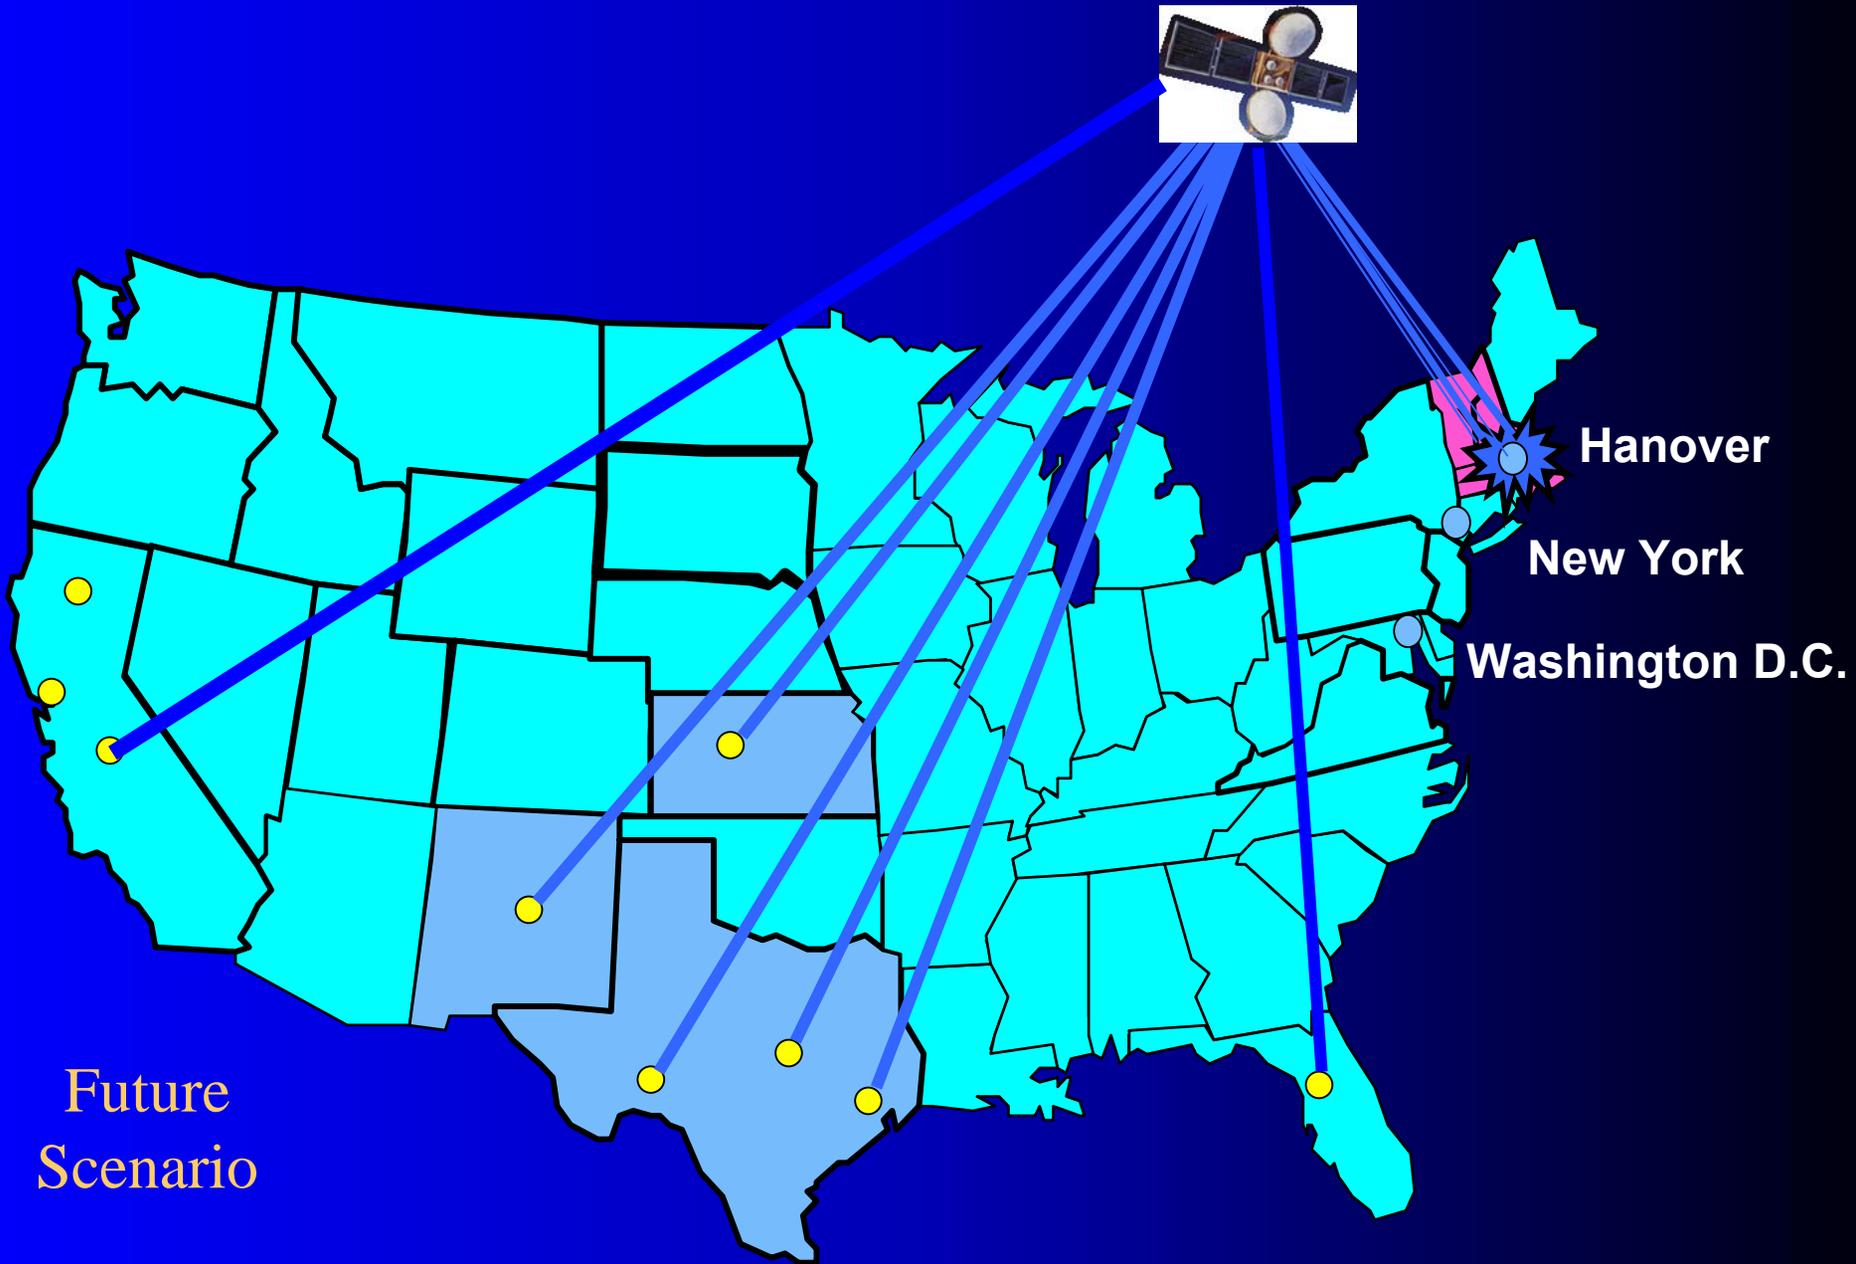

1. Command and Control

- Who?
- Where?
- How Much?
- Assume a totally new National Guard
- Assume “homeland defense” (HD) has been funded and is operational

Who?

- Technology Panel Scenario
- Scenario Summary
 - Dartmouth College Coliseum Attack
 - Day 4: 3:00 pm, signal sounded
 - Day 4: 3:30 pm, Washington, D.C.- HD notifies TX, FL, and CA of potential Tularemia infection

Technology Future Response System

How Much?

- Day 4, a.m.
 - Expanded surveillance indicates a growing number of critically ill and less severely ill
 - Contact state department of health
 - Contact FBI branch
 - Contact homeland defense network (HDN)

Response Cont'd.

- Day 4, 12:00 – 15:00
 - 5 acute care centers brought online and 5 at NEHC [securely]
 - Homeland defense stage 1 alert (heightened awareness-remain available) [securely]
- 15:00 (preliminary diagnosis returns)
 - 5 acute centers are notified “Tularemia”
 - Obtain existing headcount of local reporters- report count to HDN (know local resources)’
 - HDN passes diagnosis on to CDC. CDC responds by mobilizing medical supplies
 - Community outreach to inform local residents of event

Day 4

- 16:00
 - Information management by HDN
 - Activate local C&C emergency operations Center (EOC)
 - HDN activates Texas, FL, CA (to stage 2 awareness)
 - Run predictive resource analysis model at EOC and verified by HDN (determine resource targets)
 - Numbers reported are compared by region as part of model
 - Epidemiology (query initial patients and verify)

Real

Future
Scenario

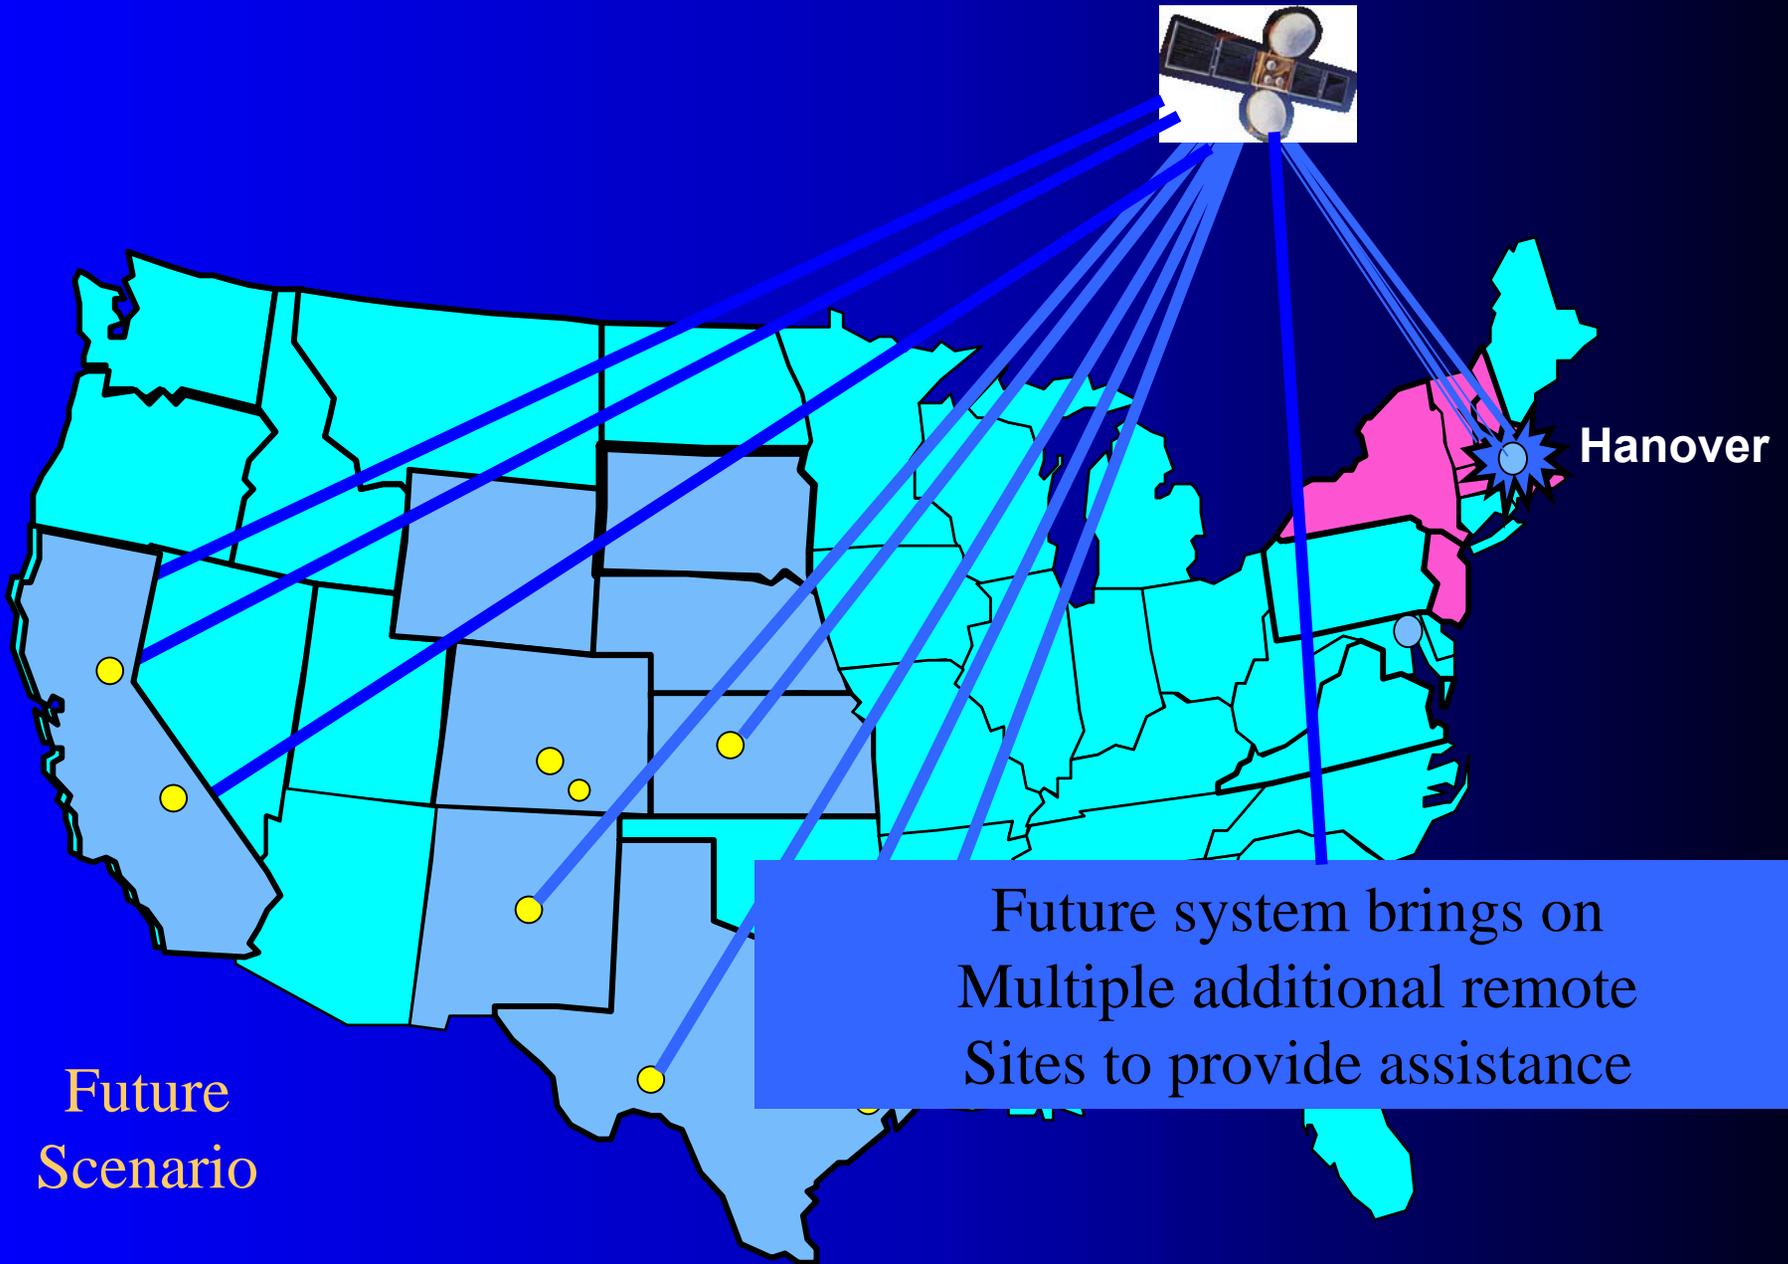

Day 4 – stage 2

- 21:00
 - Commandeer portion of existing communications infrastructure (sized by resource allocation model)
 - Begin install new communications infrastructure
 - Secure food and water supply
 - Listen for pings from remote HDN resources (e.g. reports of other incidents)
 - Turn over computer operations to HDN control
 - Triage turned over to HDN control
 - Robots are deployed (security, medical deliveries, reconnaissance, situational awareness)

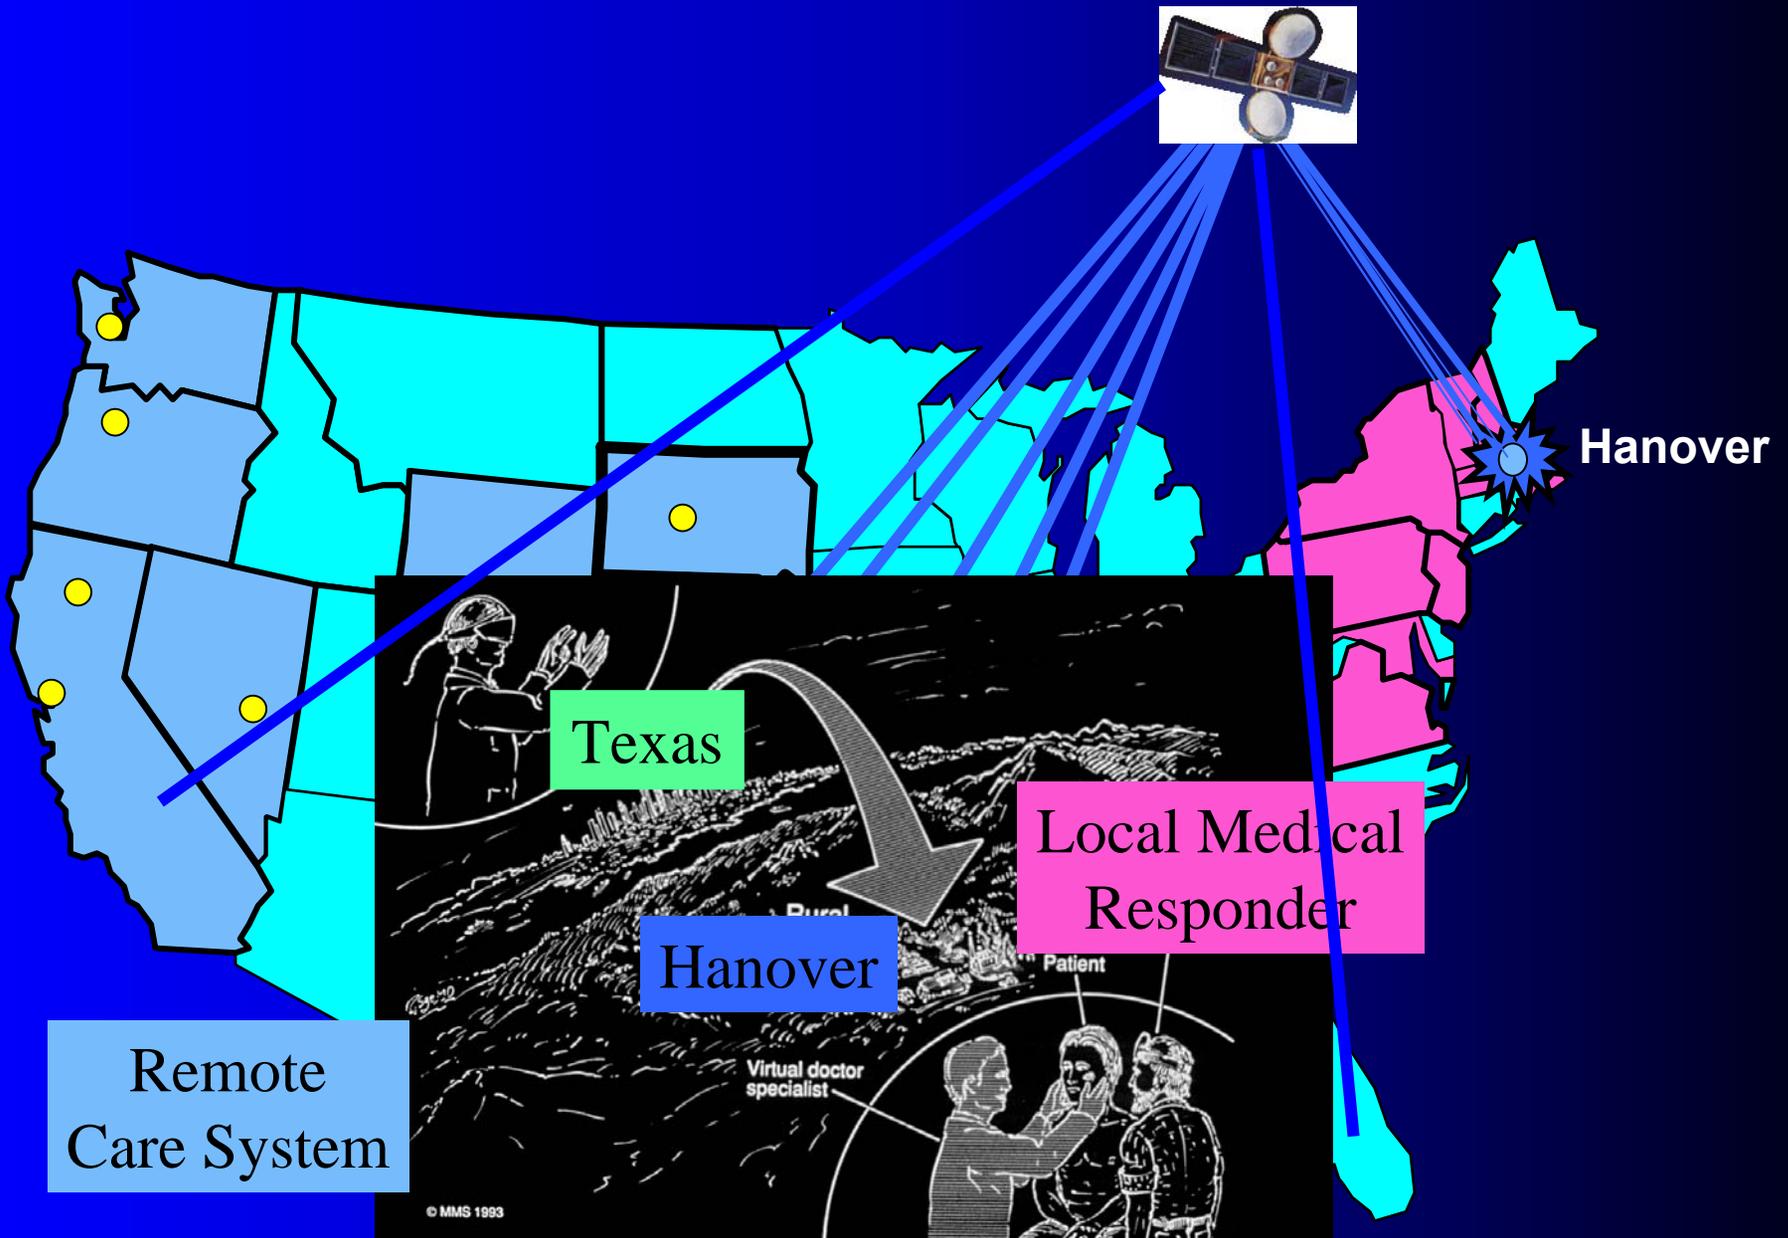

Day 5- stage 3

- Midnight
 - Starbucks (it'll be in Hanover by now)
 - Evaluate condition of early responders (HDN computers automated pupil response test)
 - This begins the need for backfill process
 - Remote resource refuse involvement
 - HDN mobilizes more remote ID (infectious disease doctors)
